

## Web Design & Development

Are you looking to build or improve your online presence?

I'm your man. I make stunning websites, blogs, CMS solutions, eCommerce, web app design, iPhone app design and much more. I love creating flexible, stylish and future-proof websites with obsessive attention to detail in layouts, typography, colours and interactivity.

## Web Marketing & Social Media

Learn how to market your products and services over the Internet!

Manage your email marketing campaigns with state of the art, industry standard software, taking advantage of the most innovative SEO techniques and fully integrate your website with Facebook, Twitter, Youtube and any other social networks that you can think of.

## Logo Design & Corporate Identity

Make your business unique and instantly recognizable!

I design engaging logos, business cards, leaflets, headed paper, envelopes, brochures, posters, t-shirts and much more. Consistency in all your printed and online communication is vital to define the personality of your corporate identity and achieve your business goals.

## Support, Training & Maintenance

The launch of a website is just the beginning!

I provide ongoing support, analysis and strategy to optimize your website's performance and extend its possibilities with new functionality, based on real world use. I also deliver training on HTML, CSS, Accessibility, Usability, Wordpress, Photoshop and jQuery.
